

PROFESSIONAL SUMMARY

Full Stack Developer and Data Science undergraduate at IIT Madras with hands-on experience shipping scalable, production-ready web applications using React, Next.js, and Node.js, plus applied ML experience training models in Python and scikit-learn. Delivered end-to-end products across internships and freelance engagements. Solved 1,000+ DSA problems; seeking software engineering, full-stack, or AI/ML roles.

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, JavaScript (ES6+), SQL, HTML5, CSS3
Frontend Technologies: React.js, Next.js, TypeScript, Tailwind CSS, Framer Motion
Backend Technologies: Node.js, Express.js, NestJS, Django, Flask, Socket.io
Databases: MongoDB, MySQL, PostgreSQL
Core Concepts: Data Structures and Algorithms, OOP, System Design, API Security
Monitoring & Analytics: Mixpanel, PostHog, Google Analytics, Sentry
Tools and Platforms: Git, GitHub, Postman, Linux, VS Code, Vercel, Render, Razorpay, AWS

EDUCATION

Indian Institute of Technology Madras <i>Bachelor In Data Science and Applications — CGPA: 8.27</i>	Chennai, India <i>Apr 2024 – Jun 2028</i>
Central Hindu Boys' School (B.H.U) <i>Intermediate (Higher Secondary Education)</i>	Varanasi, India <i>Apr 2021 – Jun 2023</i>

EXPERIENCE

Full Stack Developer Intern <i>IAVerse (Remote)</i> - Migrated multiple 1,200+ page WordPress site to Next.js, rebuilding content architecture, routing, and UI components without data loss. - Instrumented Mixpanel and Sentry, using step-level error tracking to resolve 5–6 recurring production issues. - Developed a doctor-patient booking and management module with supporting REST APIs, handling appointment scheduling, patient records, and provider workflows. - Led SEO, GEO (Generative Engine Optimization), and AEO (Answer Engine Optimization) optimization, increasing organic traffic by 5–6%. Tech: Next.js, React, Tailwind CSS, NestJS, Mixpanel, Sentry	Feb 2026 – Aug 2026
Full Stack AI Engineer <i>KaiKa AI (Remote)</i> - Engineered the full-stack web application for KaiKa AI's workforce alignment platform. - Trained a machine learning model in Python and scikit-learn to generate employee alignment scores, powering the platform's core scoring engine. - Deployed the application across AWS Amplify (frontend) and AWS EC2 (backend), handling environment configuration for production. Tech: Next.js, React, Node.js, Express.js, Python, scikit-learn, AWS Amplify, AWS EC2	Nov 2025 – Feb 2026
Full Stack Developer <i>SRS Classes (Freelance, Remote)</i> - Delivered a responsive educational web application using Next.js and React, supporting 1,500+ daily active users with stable cross-device performance. - Reduced page load times by approximately 30% through server-side rendering optimisations, asset compression, and SEO best practices. - Owned the full product lifecycle — development, deployment, monitoring, and maintenance — as a solo contractor over one month. Tech: Next.js, React, Tailwind CSS, Framer Motion, MongoDB, Mongoose, Vercel	Nov 2024 – Dec 2024

PROJECTS

Prescripto – Hospital Prescription Management System – [Patient](#) — [Doctor](#) — [Admin](#)

- Architected and deployed a full-stack, multi-portal healthcare platform solo — three Next.js frontends (Patient, Doctor, Admin) backed by a shared Node.js/Express REST API.
- Enforced Role-Based Access Control (RBAC) across 3 user roles (Patient, Doctor, Admin), enabling appointment booking, prescription issuance, and hospital-wide administration.
- Modeled relational and document data (patients, doctors, prescriptions, appointments) across MongoDB and PostgreSQL to handle flexible and structured queries.

Tech: Next.js, React, Node.js, Express.js, MongoDB, JWT, PostgreSQL, Vercel, Render

Cryptofolio – Crypto Portfolio Management Platform – [cryptofolio.vercel.app](#)

- Developed a decoupled MERN-stack crypto portfolio platform (Next.js 14, Express, MongoDB Atlas) featuring a virtual demo trading engine where users start with a 10,000 balance and holdings are computed by replaying Buy/Sell history.
- Integrated CoinGecko API to track live prices and portfolio valuations across 97+ coins, TradingView widgets for interactive charts, and Cloudinary for profile image uploads — called client-side to reduce backend load.
- Implemented JWT-based authentication with bcrypt password hashing, helmet for security headers, and express-rate-limit (20 requests/minute) to protect API endpoints from abuse.

Tech: Next.js 14, React 18, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, JWT, bcrypt, CoinGecko API, Cloudinary, TradingView, Vercel, Render

Prsnn. – Freelance Project – [Prsnn.com](#)

EVAA Enterprises – Freelance Project – [evaa.enterprises](#)

Axiora Learning – Freelance Project – [axioralearning.com](#)

ACHIEVEMENTS & CERTIFICATIONS

- Accumulated 2,100+ GitHub commits across personal, freelance, and internship projects, reflecting consistent development output.
- Solved 1,000+ Data Structures and Algorithms problems across LeetCode and Codeforces, with strengths in Trees, Graphs, and Dynamic Programming.
- Completed a Full Stack Web Development certification covering backend architecture, REST API design, and relational/NoSQL databases.
